Dear Prof. Pavičić,

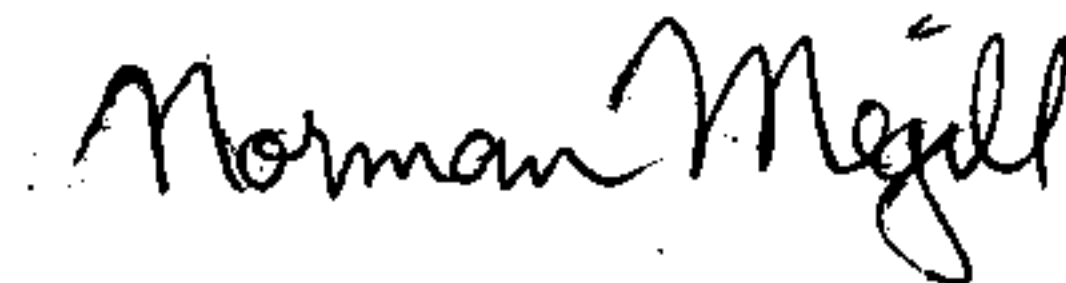

This letter confirms that I am willing to work with you on the project you are proposing, "Quantum Computation: Parallelism and Visualization," for a period of 5 years.

Specifically, I can commit to work on the following parts of this project: Hilbert space quantum algebras, quantum algorithms, massively parallel calculations, programming, and electronic circuits.

It is my intent to do my PhD thesis under your supervision by working on this project, and I would anticipate completing it before the project comes to a close.

The results that we have arrived at so far from our past collaborations would be used as a basis for much of the work on the project.

Sincerely,

A handwritten signature in black ink that reads "Norman Megill". The signature is written in a cursive style with a large, stylized 'M' and 'N'.

Norman Megill
